

33. The combination of claim 11 including voltage re-routing control circuitry operatively connected with said charging device and said power storage device, for activating said charging device at times when AC line voltage is sufficient to operate said flasher means.

*Rule 1.126*  
*34* 34. The combination of claim 33 including a line or lines connected between said charging device and the output side of said voltage disconnecting device.

*35* 35. The combination of claim 33 including a voltage reduction circuitry operatively connected between said voltage disconnecting device and said flasher means.

*36* 36. The combination of claim *35* 36 including a control line or lines connected between said voltage re-routing control circuitry and the output side of said voltage reduction circuitry.

37 ~~35~~. The combination of claim <sup>35</sup>~~36~~ including a control line or lines connected between said voltage re-routing control circuitry and the output side of said flasher means.
